The article deals with legislation regarding realization and authorization of the selected geodetic and cartographic activities in Slovakia and provides a definition and distribution of them. Further discusses the authorization of the selected geodetic and cartographic activities by authorized surveyors and cartographers, who are associated in Chamber of Surveyors and Cartographers and also the legalization of results of the selected geodetic and cartographic activities. Later shows brief information about Chamber of Surveyors and Cartographers in Slovakia, its history and present activities.
Basic Acts

- Act No. 215/1995 of National Council of SR on Geodesy and Cartography (Geodesy and Cartography Act)
- Act No. 162/1995 of the NC SR on the Real Estate Cadastre and the Entries of Ownership and Other Rights to the Real Estates (The Cadastral Act)
- Act No. 216/1995 of the NC SR on the Chamber of Surveyors and Cartographers
Realization of all Geodetic and Cartographic Activities

According § 5 – Qualifications for realization are:

- Personal qualification – **geodetic and cartographic** secondary school or university
- Personal professional practice – minimum **3 years**
- Corporate body – responsible **representative**
§ 6 – Selected geodetic and cartographic activities

Activities, which are taken into state documentation:

a) Geometric or plot plans
b) Geodetic activities for land consolidation
c) Staking out of plot boundaries
d) Institute and actualization of geodetic points
e) Measurement or digitizing of subject, which are taken into basic state maps, range above 0,025 km²
Other selected geodetic and cartographic activities

f) Measurement or digitizing of subject, which creates content of thematic maps, range above 0,025 km²

g) Building up of staking out networks

h) Staking out and control measurement of keeping a spatial position of building structures

i) Measurement of real realization of building and staking out and control measurement of industry building and equipment

j) Activities by building up and actualization of GIS for state and regional government
§ 7 – Authorization of some selected activities

Activities according § 6, type a), b), c), d) and e) are authorized by a person with special professional qualification and authorization:

- geodetic and cartographic university – the second stage
- 5 years professional practice in some selected activities
- passed the qualification exam examination before the committee at Geodesy, Cartography and Cadastral Authority of the SR (GCCA SR)
- member of the Chamber of Surveyors and Cartographers
§ 8 – Authorization of other selected activities

Activities according § 6, type d), e), f), g), h), i) and j) are authorized by a person with special professional qualification and authorization according Act No. 216/1995 of the NC SR on the Chamber of Surveyors and Cartographers:

- geodetic and cartographic university – the second stage
- 5 years professional practice in other selected activities
- passed the qualification exam examination before the committee at Chamber of Surveyors and Cartographers
- member of the Chamber
Results of selected activities according § 6, type a), b), d) and e), which are taken into state documentation have to be legalized also by administrative of cadaster.

Legalization is realized by a person, who represents administrative of cadaster as an employee of cadaster office and has special professional qualification given by GCCA SR.
Results of selected activities in **non-profit** and **contributory organization**, which realize geodetic and cartographic activities, are authorized by own **employee**, who has special professional qualification given by GCCA SR.
§ 12 – Responsibilities by realization of all activities

Persons and corporate body are responsible:

a) to keep qualitative conditions

b) to inform about negatives in state documentation

c) to inform about acquisition of primary aerial sensing or measuring materials and to give it free of cost for archive purposes

d) to require acceptance for using state cartographic works

e) to submit two issues of published cartographic work free of costs for archive purposes
§ 12 – Responsibilities by realization of selected activities

Persons and corporate body are responsible:

a) to realize activities in **definite geodetic systems** and localization standards

b) to ensure its **authorization**

c) to provide **numbering of geodetic points** in interoperation with cadaster

d) **to submit free of costs** geometric or plot plan, elaborate about staking out plot boundary, results of building up geodetic points and results of measurement or digitalization of subject, which are taken into basic state maps, range above 0,025 km²
Brief information about Chamber of Surveyors and Cartographers in Slovakia, its history and present activities.

KOMORA
GEODETOV
A KARTOGRAFOV
Na paši 4
821 02 BRATISLAVA
1860 – Creation of three categories of office assigned civil technicians – civil geometers, civil engineers and architects in Austria–Hungary by the statue of the State Ministry No. 268 in December 11

1913 – Emperor Francis Joseph I issued in January 10 the Act No. 3, by witch are instituted Engineering Chambers

„...to help to authorized private engineers interests and to protect a corporative honor of this profession.“
1920 – Establishing of the Engineering Chamber in Czechoslovakia by the government statue No. 185 from March 18.

Civil geometers created 30% from all members.

Two groups of activity of civil geometers:

a) tasks connected with land cadaster
b) tasks realized according the rules of civil offices
1941 – Act No. 48 from March 26 about civil engineers, which in § 2 established 9 categories of engineers, civil engineers surveyors were 63 in year 1944.

1951 – The Act of the National Council of Czechoslovakia No. 61 from July 11 by which are cancelled authorization of civil technicians and Engineering Chamber.
